COMPETENCIES OF A COMPLETED STAFF WORK (CSW) PRACTITIONER

Based on the Simplified 5-Step CSW Process

Prepared by **Saidamen R. Mambayao**
Chief of Staff at the BTA Parliament (Office of MP Ramos)

THE CSW COMPETENCIES AT A GLANCE:

The competencies of a completed staff work (CSW) practitioner based on the simplified 5-step CSW process are summarized in the acronym **ACSCCRaPATFEE**. These competencies are essential for the municipal officials and staff of the Local Government Unit of Paglat to effectively perform their roles in providing well-researched recommendations, developing plans and strategies that align with the goals and priorities of the Municipal Government, and building relationships with stakeholders while maintaining ethical principles and values. These competencies are as follows:

1. ***A**NALYTICAL AND CRITICAL THINKING*: The ability to evaluate information and data to make informed decisions.
2. ***C**REATIVITY AND INNOVATION*: The ability to generate new and unique ideas and solutions to problems.
3. ***S**TRATEGIC THINKING*: The ability to anticipate and plan for the future to achieve organizational goals.
4. ***C**OMMUNICATION*: The ability to effectively convey information and ideas to others.
5. ***C**OLLABORATION AND TEAMWORK*: The ability to work effectively with others towards a common goal.
6. ***R**ESEARCH AND **A**NALYSIS*: The ability to gather and analyze information to inform decision making and problem solving.
7. ***P**ROBLEM-SOLVING AND DECISION MAKING*: The ability to identify and address problems and make informed decisions.
8. ***A**TTENTION TO DETAILS AND QUALITY*: The ability to perform work accurately and thoroughly, with a focus on quality.
9. ***T**IME AND ATTENTION MANAGEMENT*: The ability to manage time effectively and focus attention on tasks to maximize productivity.
10. ***F**LEXIBILITY AND ADAPTABILITY*: The ability to adjust to new and changing situations and demands.
11. ***E**MOTIONAL INTELLIGENCE AND ACCOUNTABILITY*: The ability to understand and manage one's emotions and take responsibility for one's actions.
12. ***E**THICS AND INTEGRITY*: The adherence to moral and ethical principles and values in behavior and decision making.

THE CSW COMPETENCIES IN DETAIL

For the municipal officials and staff of the Local Government Unit of Paglat, it is important to define the competencies well to ensure that they possess the skills and abilities needed to perform their roles effectively. A clear understanding of the competencies required in their work allows staff to develop their skills, focus their efforts, and contribute to the organization's success. Defining the competencies also helps to identify areas for improvement and create training and development opportunities to address any gaps in skills or knowledge. This ultimately enhances the quality of work produced, improves decision-making, and increases the efficiency and effectiveness of the staff's work.

ANALYTICAL AND CRITICAL THINKING
First Competency of CSW Practitioners

Analytical and critical thinking is a crucial competency for municipal officials and staff of the LGU of Paglat to effectively gather, analyze, and interpret information to make well-informed decisions and provide sound recommendations. This competency involves identifying patterns and relationships, drawing logical conclusions, and making evidence-based decisions. It requires an understanding of complex issues, an ability to analyze data, and a capacity to identify alternative solutions to problems. Here are the indicators for this competency, ranging from simple to complex:

Simple:

- Presents information in a clear and concise manner
- Identifies key issues and priorities
- Draws logical conclusions based on available information
- Recognizes patterns and trends in data

Intermediate:

- Analyzes complex issues and identifies root causes of problems
- Gathers and synthesizes information from multiple sources
- Develops evidence-based recommendations and solutions
- Anticipates potential challenges and proposes proactive measures
- Communicates findings and recommendations effectively to stakeholders

Complex:

- Conducts comprehensive research and analysis on complex, multifaceted issues
- Develops innovative solutions to address systemic problems
- Evaluates the long-term impact and sustainability of proposed solutions
- Facilitates data-driven decision making and problem-solving processes
- Builds the analytical and critical thinking capacity of others in the organization
- Represents the LGU in high-stakes decision-making and problem-solving situations

RUBRICS FOR MEASURING ANALYTICAL AND CRITICAL THINKING:

Limited:
The staff member struggles to identify key issues and draw logical conclusions from available information. They present information in an unclear or disorganized manner and have difficulty recognizing patterns or trends in data. Their analysis of problems is superficial, and they rarely propose solutions or anticipate potential challenges.

Developing:
The staff member can identify key issues and draw basic conclusions from information, but may struggle with more complex analysis. They present information clearly but may not always be concise. They recognize obvious patterns and trends in data, but may not dig deeper to uncover root causes or systemic issues. They propose solutions to problems, but these may not always be evidence-based or fully developed.

Proficient:
The staff member consistently demonstrates strong analytical and critical thinking skills. They adeptly analyze complex issues, identify root causes, and develop evidence-based solutions. They present information in a clear, concise, and compelling manner, and effectively communicate their findings and recommendations to stakeholders. They anticipate potential challenges and propose proactive measures to address them.

Advanced:
The staff member is a recognized expert in analytical and critical thinking, sought out by others for their ability to tackle the most complex and challenging issues facing the LGU. They conduct comprehensive research and analysis, and develop innovative, sustainable solutions that drive long-term impact. They are skilled at facilitating data-driven decision making and building the analytical capacity of others. They represent the LGU with distinction in high-stakes situations.

Expert:
The staff member is a visionary leader in analytical and critical thinking, known for their exceptional ability to analyze, interpret, and synthesize information to drive transformative change. They are at the forefront of developing new analytical frameworks and methodologies that push the boundaries of what is possible in local governance. They are a sought-after advisor and thought leader, shaping the discourse and direction of evidence-based decision making in the public sector. Their work consistently delivers breakthrough results and sets new standards for excellence.

IMPACT OF FAILING TO USE THE COMPETENCY IN ANALYTICAL AND CRITICAL THINKING

Failing to cultivate analytical and critical thinking skills among the municipal officials and staff of the LGU of Paglat can have severe consequences for the quality and effectiveness of local governance. Some of the potential impacts include:

- **Poor decision making**: Without strong analytical skills, officials may make decisions based on incomplete, inaccurate, or irrelevant information. This can lead to suboptimal outcomes, wasted resources, and even harm to the community.

- **Inability to solve complex problems**: Many of the challenges facing local governments are complex and multifaceted, requiring deep analysis and creative problem-solving. Without these skills, the LGU may struggle to effectively address issues such as poverty, infrastructure, or environmental sustainability.

- **Lack of innovation**: Analytical and critical thinking are key drivers of innovation in local governance. Without these skills, the LGU may become stuck in old ways of doing things and miss out on opportunities to improve services, reduce costs, or address emerging needs.

- **Ineffective resource allocation**: Proper analysis is essential for making informed decisions about how to allocate limited resources for maximum impact. Without it, the LGU may invest in programs or projects that fail to deliver results or meet community needs.

- **Vulnerability to misinformation**: In an era of information overload and "fake news," critical thinking skills are essential for distinguishing fact from fiction and making evidence-based decisions. Without these skills, the LGU may be swayed by misinformation or political pressure, undermining public trust and effective governance.

- **Reputational damage**: Poor decisions, ineffective programs, or public scandals resulting from a lack of analytical rigor can severely damage the LGU's reputation and erode public confidence in local government.

IMPROVING THE COMPETENCY IN ANALYTICAL AND CRITICAL THINKING

Institutional Level:

- Provide training and development opportunities: Invest in training programs that build analytical and critical thinking skills among staff at all levels of the LGU. This can include workshops on data analysis, problem-solving techniques, or evidence-based decision making.

- Foster a culture of inquiry and evidence-based decision making: Encourage a culture where questioning assumptions, seeking data, and basing decisions on evidence are the norm. Reward and recognize staff who demonstrate strong analytical skills and promote a learning mindset.

- Implement data management and analysis systems: Invest in technology and systems that enable the LGU to effectively collect, store, analyze, and use data to inform decision making. Ensure that staff have the tools and skills they need to leverage these systems.

- Encourage cross-functional collaboration: Foster collaboration and knowledge sharing across departments and functions to bring diverse perspectives and expertise to bear on complex problems. Establish cross-functional teams or task forces to tackle specific analytical challenges.

- Partner with academic or research institutions: Build partnerships with universities, think tanks, or other research organizations that can provide analytical expertise, capacity building, or access to cutting-edge tools and methodologies.

Individual Level:

- Develop a questioning mindset: Cultivate a habit of asking probing questions, challenging assumptions, and seeking to understand the "why" behind issues or data. Don't accept information at face value without verifying its accuracy and relevance.

- Enhance data literacy skills: Invest in developing your skills in data collection, analysis, visualization, and interpretation. Take courses, attend workshops, or seek out mentors who can help you build these capabilities.

- Practice structured problem-solving: Learn and apply frameworks and tools for breaking down complex problems, identifying root causes, generating options, and evaluating solutions. Use these consistently to build your analytical muscles.

- Seek out diverse perspectives: Actively seek out views and experiences different from your own to broaden your understanding of issues and challenge your assumptions. Engage with colleagues, stakeholders, and experts who can offer new insights.

- Learn from successes and failures: Treat every decision or project as a learning opportunity. Conduct after-action reviews to analyze what worked, what didn't, and why. Use these insights to continuously improve your analytical approach.

- Stay current with industry trends and best practices: Keep abreast of emerging trends, technologies, and best practices in your field and in local governance more broadly. Attend conferences, join professional networks, and read widely to stay at the forefront of analytical thinking.

By implementing these strategies at both the institutional and individual levels, the LGU of Paglat can build a strong foundation of analytical and critical thinking that drives effective, evidence-based local governance. This is essential for tackling the complex challenges facing communities today and seizing opportunities to innovate and thrive.

CREATIVITY AND INNOVATION
Second Competency of CSW Practitioners

Creativity and innovation are essential competencies for municipal officials and staff of the LGU of Paglat to generate new and unique ideas and solutions to local governance challenges. This competency involves thinking outside the box, challenging conventional wisdom, and developing novel approaches to problem-solving. It requires an open-minded and curious attitude, a willingness to take calculated risks, and the ability to adapt to changing circumstances. Here are the indicators for this competency, ranging from simple to complex:

Simple:

- Demonstrates a willingness to consider new ideas and approaches
- Participates actively in brainstorming sessions to generate ideas for local governance improvements
- Shows openness to feedback and suggestions from colleagues and community members
- Identifies areas where existing processes or services can be improved

Intermediate:

- Proposes creative solutions to local governance challenges that go beyond conventional approaches
- Adapts best practices from other LGUs or sectors to the specific context of Paglat
- Encourages and facilitates creative thinking and idea generation among team members
- Experiments with new technologies or tools to enhance service delivery and efficiency

Complex:

- Develops and implements innovative programs or initiatives that address complex local governance issues
- Fosters a culture of innovation within the LGU, encouraging calculated risk-taking and learning from failures
- Collaborates with diverse stakeholders to co-create solutions that meet the unique needs of the Paglat community
- Anticipates future challenges and proactively develops innovative strategies to address them
- Contributes to the development of new policies or guidelines that promote innovation in local governance

RUBRICS FOR MEASURING CREATIVITY AND INNOVATION:

Limited:
The staff member demonstrates a limited willingness to consider new ideas and approaches, often preferring to stick to conventional methods. They may participate in brainstorming sessions but rarely contribute original ideas. They may be hesitant to experiment with new technologies or tools and may struggle to adapt to changing circumstances.

Developing:
The staff member shows a growing openness to new ideas and approaches, and actively participates in brainstorming sessions. They may propose some creative solutions to local governance challenges, but these may not always be feasible or well-developed. They are willing to experiment with new technologies or tools, but may need guidance in adapting them to the Paglat context.

Proficient:
The staff member consistently demonstrates creativity and innovation in their work, proposing original and feasible solutions to local governance challenges. They effectively adapt best practices from other contexts to the specific needs of Paglat, and actively encourage creative thinking among their team members. They are proficient in experimenting with new technologies and tools to enhance service delivery and efficiency.

Advanced:
The staff member is a recognized leader in promoting creativity and innovation within the LGU. They develop and implement innovative programs or initiatives that address complex local governance issues, and foster a culture of innovation that encourages calculated risk-taking and learning from failures. They effectively collaborate with diverse stakeholders to co-create solutions and anticipate future challenges, proactively developing innovative strategies to address them.

Expert:
The staff member is an expert in creativity and innovation, consistently pushing the boundaries of what is possible in local governance. They are a visionary leader who inspires and empowers others to think creatively and develop groundbreaking solutions. They are skilled in fostering a culture of innovation that permeates all levels of the LGU, and are sought out by other organizations for their expertise in this area. They make significant contributions to the development of new policies or guidelines that promote innovation in local governance, and are recognized as a thought leader in this field.

IMPACT OF FAILING TO USE THE COMPETENCY IN CREATIVITY AND INNOVATION

Failing to cultivate creativity and innovation among the municipal officials and staff of the LGU of Paglat can have significant negative consequences for the effectiveness and responsiveness of local governance. Some of the potential impacts include:

- Stagnation in service delivery: Without creativity and innovation, the LGU may continue to rely on outdated or ineffective methods of delivering services to the community, leading to suboptimal outcomes and dissatisfaction among constituents.

- Missed opportunities for improvement: A lack of creativity and innovation can cause the LGU to overlook opportunities to streamline processes, reduce costs, or enhance the quality of services, leading to inefficiencies and wasted resources.

- Inability to adapt to changing circumstances: In a rapidly evolving world, the ability to adapt and innovate is crucial for the success of any organization. Without this competency, the LGU may struggle to respond effectively to new challenges or opportunities, leaving it vulnerable to external threats.

- Reduced competitiveness: As other LGUs embrace creativity and innovation to improve their performance and attract investment, the LGU of Paglat may fall behind in terms of competitiveness and economic development if it fails to foster these competencies among its staff.

- Decreased staff engagement and motivation: A lack of emphasis on creativity and innovation can lead to a stagnant and uninspiring work environment, reducing staff engagement and motivation. This can result in higher turnover rates, lower productivity, and a diminished capacity to serve the community effectively.

IMPROVING THE COMPETENCY IN CREATIVITY AND INNOVATION

Institutional Level:

- Establish an innovation fund: Create a dedicated fund to support the development and implementation of innovative ideas and projects within the LGU. This can provide staff with the resources and incentives needed to pursue creative solutions to local governance challenges.

- Foster a culture of experimentation: Encourage a culture that values experimentation, calculated risk-taking, and learning from failures. This can be achieved through leadership messaging, recognition programs, and the creation of safe spaces for staff to test new ideas.

- Provide training and development opportunities: Invest in training and development programs that focus on creativity, innovation, and design thinking. This can help staff develop the skills and mindset needed to generate and implement novel solutions.

- Collaborate with external partners: Engage with academic institutions, private sector organizations, and civil society groups to tap into external sources of creativity and innovation. This can provide the LGU with access to new ideas, technologies, and best practices that can be adapted to the Paglat context.

- Incorporate innovation into performance evaluations: Include creativity and innovation as key criteria in staff performance evaluations and reward systems. This can help to reinforce the importance of these competencies and motivate staff to prioritize them in their work.

Individual Level:

- Seek out diverse perspectives: Actively seek out and engage with individuals from diverse backgrounds and disciplines to gain exposure to new ideas and approaches. This can help to broaden one's thinking and generate novel insights.

- Participate in ideation sessions: Regularly participate in brainstorming and ideation sessions, both within the LGU and with external partners. This can provide opportunities to exercise creative thinking skills and contribute to the development of innovative solutions.

- Stay informed about trends and best practices: Keep abreast of the latest trends, technologies, and best practices in local governance and related fields. This can provide inspiration and ideas for creative problem-solving and innovation.

- Experiment with new tools and methods: Be willing to experiment with new tools, technologies, and methods in one's work, and share the results with colleagues. This can help to identify promising innovations and build a culture of experimentation within the LGU.

- Cultivate a growth mindset: Embrace a growth mindset that values continuous learning, adaptability, and resilience in the face of challenges. This can help to foster the creativity and innovation needed to thrive in a rapidly changing environment.

By implementing these strategies at both the institutional and individual levels, the LGU of Paglat can cultivate a strong competency in creativity and innovation among its municipal officials and staff, enhancing its ability to deliver effective and responsive governance to the community.

STRATEGIC THINKING
Third Competency of CSW Practitioners

Strategic thinking is a crucial competency for municipal officials and staff of the LGU of Paglat to anticipate future challenges and opportunities, and to develop long-term plans that align with the municipality's vision and goals. This competency involves the ability to see the big picture, to think critically about complex issues, and to make decisions that consider both short-term and long-term impacts. Here are the indicators for this competency, ranging from simple to complex:

Simple:

- Demonstrates an understanding of the LGU's vision, mission, and strategic objectives
- Identifies trends and patterns that may impact the municipality's future
- Considers multiple perspectives when analyzing issues and making decisions
- Aligns individual work goals with the LGU's strategic priorities

Intermediate:

- Develops long-term plans that anticipate future challenges and opportunities for the municipality
- Identifies strategic partnerships and collaborations that can help achieve the LGU's goals
- Analyzes complex data and information to inform strategic decision-making
- Communicates the LGU's strategic vision and priorities to stakeholders effectively

Complex:

- Develops innovative strategies to address emerging challenges and opportunities in local governance
- Leads the development and implementation of the LGU's strategic plan, ensuring alignment across departments and programs
- Anticipates and proactively addresses potential risks and obstacles to achieving strategic objectives
- Fosters a culture of strategic thinking and continuous improvement within the LGU
- Represents the LGU in strategic discussions and negotiations with external partners and stakeholders

RUBRICS FOR MEASURING STRATEGIC THINKING:

Limited:

The staff member demonstrates a limited understanding of the LGU's strategic objectives and struggles to align their work with these priorities. They may focus primarily on short-term tasks and fail to consider the long-term implications of their decisions. They rarely contribute to strategic discussions or planning efforts.

Developing:
The staff member has a growing awareness of the LGU's strategic priorities and is beginning to align their work accordingly. They are able to identify some trends and patterns that may impact the municipality's future, but may not consistently consider these factors in their decision-making. They participate in strategic discussions and planning efforts, but may not yet contribute substantively.

Proficient:
The staff member consistently demonstrates an understanding of the LGU's strategic objectives and aligns their work effectively with these priorities. They are able to analyze complex data and information to inform their decision-making, and they consider both short-term and long-term impacts. They actively contribute to strategic discussions and planning efforts, offering valuable insights and ideas.

Advanced:
The staff member is a strategic leader who proactively anticipates future challenges and opportunities for the municipality. They develop innovative strategies to address these issues and effectively communicate the LGU's strategic vision to stakeholders. They foster a culture of strategic thinking within their team and consistently make decisions that align with the LGU's long-term goals.

Expert:
The staff member is a visionary strategic thinker who is able to develop and implement comprehensive, long-term plans that position the LGU for success. They are skilled at identifying and leveraging strategic partnerships and collaborations to achieve the municipality's goals. They are a thought leader in local governance, representing the LGU in high-level strategic discussions and negotiations. They inspire and empower others to think strategically and continuously improve the LGU's performance.

IMPACT OF FAILING TO USE THE COMPETENCY IN STRATEGIC THINKING

Failing to cultivate strategic thinking among the municipal officials and staff of the LGU of Paglat can have significant negative consequences for the long-term success and sustainability of the municipality. Some of the potential impacts include:

- Short-sighted decision-making: Without strategic thinking, officials and staff may focus primarily on short-term issues and challenges, failing to consider the long-term implications of their decisions. This can lead to reactive, rather than proactive, governance and missed opportunities for growth and improvement.

- Lack of direction and focus: In the absence of a clear strategic vision and plan, the LGU may struggle to prioritize initiatives and allocate resources effectively. This can result in a scattered, unfocused approach to local governance that fails to address the most critical needs of the community.

- Missed opportunities for innovation: Strategic thinking is essential for identifying and capitalizing on emerging opportunities and trends in local governance. Without this competency, the LGU may fail to adapt to changing circumstances and fall behind other municipalities in terms of innovation and best practices.

- Difficulty achieving long-term goals: Effective strategic thinking is necessary to develop and implement long-term plans that align with the LGU's vision and goals. Without this competency, the municipality may struggle to make progress on its most important objectives and fail to deliver the outcomes that matter most to its constituents.

- Ineffective use of resources: Strategic thinking helps ensure that the LGU's limited resources are allocated in a way that maximizes impact and value for the community. Without this competency, the municipality may waste resources on initiatives that do not contribute to its strategic priorities or fail to invest in areas that are critical for long-term success.

IMPROVING THE COMPETENCY IN STRATEGIC THINKING

Institutional Level:

- Develop a clear strategic plan: Engage in a participatory process to develop a comprehensive strategic plan for the LGU that articulates its vision, mission, values, and long-term goals. Ensure that this plan is widely communicated and understood by all officials and staff.

- Align performance management with strategic priorities: Integrate strategic thinking competencies into the LGU's performance management system, setting clear expectations for officials and staff to demonstrate this skill in their work. Use performance evaluations and feedback to reinforce the importance of strategic thinking and to identify areas for improvement.

- Provide training and development opportunities: Invest in training and development programs that focus on strategic thinking skills, such as scenario planning, systems thinking, and data analysis. Encourage officials and staff to attend workshops, conferences, and other learning events that expose them to best practices and emerging trends in local governance.

- Foster a culture of innovation and continuous improvement: Encourage a culture that values experimentation, calculated risk-taking, and learning from failures. Celebrate and reward officials and staff who demonstrate strategic thinking and contribute to the LGU's long-term success.

- Engage in regular strategic reviews: Conduct regular strategic reviews to assess progress against the LGU's long-term goals, identify emerging challenges and opportunities, and make adjustments to plans and priorities as needed. Involve a diverse range of stakeholders in these reviews to ensure a comprehensive perspective.

Individual Level:

- Develop a strategic mindset: Cultivate a habit of thinking strategically about one's work, considering how individual tasks and decisions contribute to the LGU's long-term goals. Regularly ask questions such as "How does this align with our strategic priorities?" and "What are the long-term implications of this decision?"

- Stay informed about trends and best practices: Keep abreast of emerging trends, innovations, and best practices in local governance, both in the Philippines and globally. Attend conferences, read relevant publications, and engage in professional networks to expand one's knowledge and perspective.

- Seek out diverse perspectives: Actively seek out and consider diverse perspectives when analyzing issues and making decisions. Engage with colleagues, stakeholders, and experts from different backgrounds and disciplines to gain new insights and challenge one's assumptions.

- Develop data analysis and problem-solving skills: Invest in developing one's skills in data analysis, critical thinking, and problem-solving. These skills are essential for making informed, evidence-based decisions that consider both short-term and long-term impacts.

- Communicate strategically: Practice communicating the LGU's strategic vision and priorities in a clear, compelling way to different audiences. Develop skills in storytelling, data visualization, and persuasive communication to effectively engage and inspire others around the LGU's strategic objectives.

By implementing these strategies at both the institutional and individual levels, the LGU of Paglat can cultivate a strong competency in strategic thinking among its municipal officials and staff, positioning the municipality for long-term success and sustainability.

COMMUNICATION
Fourth Competency of CSW Practitioners

Communication is a critical competency for municipal officials and staff of the LGU of Paglat to effectively convey information, ideas, and proposals to various stakeholders. This competency involves the ability to express oneself clearly and concisely, both verbally and in writing, and to adapt communication style to different audiences and contexts. Here are the indicators for this competency, ranging from simple to complex:

Simple:
- Expresses ideas and information clearly and concisely
- Listens actively and attentively to others
- Maintains open and constructive communication with colleagues and stakeholders
- Presents information in an organized and structured manner

Intermediate:
- Adapts communication style to different audiences and contexts
- Effectively communicates complex or technical information to non-expert audiences
- Facilitates productive discussions and meetings
- Provides clear and constructive feedback to others
- Persuasively communicates the benefits and rationale behind proposed solutions or decisions

Complex:
- Develops and implements effective communication strategies for the LGU
- Skillfully negotiates and resolves conflicts or disagreements
- Inspires and motivates others through compelling communication
- Represents the LGU effectively in high-stakes communication situations, such as media interviews or public hearings
- Develops and delivers engaging presentations and reports that influence decision-making

RUBRICS FOR MEASURING COMMUNICATION:

Limited:
The staff member struggles to express ideas clearly and concisely, often using jargon or confusing language. They may not listen actively to others or adapt their communication style to different audiences. Their presentations or reports may lack structure or fail to effectively convey key messages.

Developing:
The staff member can express ideas and information clearly in most situations but may struggle with more complex or technical topics. They listen to others but may not always fully

understand or address their concerns. They are beginning to adapt their communication style to different audiences but may not always be effective in doing so.

Proficient:
The staff member consistently communicates ideas and information clearly and concisely, both verbally and in writing. They listen actively to others and effectively address their concerns or questions. They adapt their communication style to different audiences and contexts, and can effectively communicate complex information to non-expert audiences. Their presentations and reports are well-structured and persuasive.

Advanced:
The staff member is an exceptional communicator who can effectively convey complex ideas and inspire others to action. They are skilled at facilitating productive discussions and resolving conflicts or disagreements. They develop and implement effective communication strategies for the LGU and represent the organization compellingly in high-stakes situations. Their presentations and reports are highly engaging and influential.

Expert:
The staff member is a master communicator who is sought out for their expertise in crafting and delivering powerful messages. They have a deep understanding of effective communication strategies and can adapt their approach to any audience or context. They are skilled at building consensus and inspiring others to achieve shared goals. Their presentations and reports are considered benchmarks of excellence and are widely shared and celebrated within the LGU and beyond.

IMPACT OF FAILING TO USE THE COMPETENCY IN COMMUNICATION

Failing to cultivate effective communication skills among the municipal officials and staff of the LGU of Paglat can have significant negative consequences for the organization's performance and reputation. Some of the potential impacts include:

- Misunderstandings and errors: Poor communication can lead to misunderstandings about tasks, deadlines, or expectations, resulting in errors or delays that impact the quality and timeliness of work.

- Reduced collaboration and teamwork: Ineffective communication can hinder collaboration and teamwork, as staff may struggle to share ideas, provide feedback, or work together towards common goals.

- Diminished public trust: If the LGU fails to communicate effectively with the public, it can lead to misunderstandings, misinformation, or a lack of transparency, eroding public trust in the organization and its leadership.

- Missed opportunities: Poor communication can cause the LGU to miss out on valuable opportunities for partnerships, funding, or innovation, as staff may fail to effectively convey the benefits and potential of their ideas or proposals.

- Ineffective decision-making: Without clear and effective communication, decision-makers may lack the information or insights needed to make informed choices, leading to suboptimal outcomes for the LGU and its constituents.

- Low staff morale and engagement: Ineffective communication can contribute to low morale and disengagement among staff, as they may feel unheard, undervalued, or unclear about their roles and responsibilities.

- Reputational damage: Communication missteps, such as insensitive or inappropriate remarks, can damage the LGU's reputation and erode public trust, making it more difficult for the organization to achieve its goals and serve the community effectively.

IMPROVING THE COMPETENCY IN COMMUNICATION

Institutional Level:

- Provide communication skills training: Offer regular training programs focused on effective communication techniques, such as active listening, clear writing, and persuasive presentation skills. These programs should be tailored to the specific needs and contexts of the LGU and its staff.

- Establish clear communication protocols: Develop and implement clear protocols for internal and external communication, including guidelines for email etiquette, meeting facilitation, and public engagement. Ensure that all staff are trained on and adhere to these protocols.

- Foster a culture of open and respectful communication: Encourage a workplace culture that values open, honest, and respectful communication. Leaders should model effective communication behaviors and create opportunities for staff to share ideas, provide feedback, and engage in constructive dialogue.

- Invest in communication tools and technologies: Provide staff with access to modern communication tools and technologies, such as collaboration platforms, video conferencing, and project management software, to facilitate effective communication and teamwork.

- Recognize and reward effective communication: Celebrate and reward staff who demonstrate exceptional communication skills, such as those who effectively facilitate meetings, deliver compelling presentations, or resolve conflicts constructively. This can help

to reinforce the importance of effective communication and encourage others to develop their skills.

Individual Level:

- Practice active listening: Make a conscious effort to listen actively and attentively to others, asking clarifying questions and providing feedback to ensure understanding. Avoid interrupting or rushing to judgment, and show respect for diverse perspectives and ideas.

- Seek feedback and coaching: Actively seek feedback from colleagues, supervisors, and mentors on your communication skills and areas for improvement. Consider working with a communication coach or mentor to develop specific skills or techniques.

- Develop writing skills: Invest time in improving your writing skills, focusing on clarity, concision, and persuasion. Practice writing for different audiences and purposes, such as reports, proposals, or public communications, and seek feedback from others to refine your skills.

- Enhance presentation skills: Work on developing your presentation skills, including your ability to structure and deliver engaging and persuasive presentations. Practice presenting to different audiences and in various formats, such as in-person, virtual, or recorded, and seek opportunities to present your work or ideas to others.

- Adapt communication style to audience and context: Learn to adapt your communication style and approach to different audiences and contexts, considering factors such as the purpose of the communication, the level of expertise or interest of the audience, and the cultural or social norms at play. Be flexible and responsive to feedback and cues from your audience.

- Engage in continuous learning: Stay up-to-date with best practices and emerging trends in communication by attending workshops, conferences, or webinars, reading relevant books or articles, and engaging with professional networks or communities of practice.

By implementing these strategies at both the institutional and individual levels, the LGU of Paglat can cultivate a strong competency in communication among its municipal officials and staff, enhancing the organization's ability to effectively serve its constituents and achieve its goals.

COLLABORATION AND TEAMWORK
Fifth Competency of CSW Practitioners

Collaboration and teamwork are essential competencies for municipal officials and staff of the LGU of Paglat to work effectively with others towards common goals. This competency involves the ability to build and maintain positive working relationships, contribute to team efforts, and foster a supportive and inclusive work environment. Here are the indicators for this competency, ranging from simple to complex:

Simple:
- Actively participates in team meetings and discussions
- Shares information and resources with team members
- Offers assistance and support to colleagues when needed
- Treats all team members with respect and courtesy

Intermediate:
- Contributes ideas and suggestions to improve team processes and outcomes
- Proactively seeks input and feedback from team members
- Facilitates effective communication and coordination among team members
- Helps to resolve conflicts or disagreements within the team constructively
- Recognizes and celebrates team successes and individual contributions

Complex:
- Builds and maintains a network of positive working relationships across the LGU and with external stakeholders
- Fosters a culture of collaboration, trust, and mutual support within the team
- Leads or facilitates cross-functional teams to tackle complex projects or initiatives
- Mentors and coaches team members to enhance their skills and performance
- Promotes diversity, equity, and inclusion within the team and across the LGU

RUBRICS FOR MEASURING COLLABORATION AND TEAMWORK:

Limited:
The staff member struggles to work effectively with others, often preferring to work independently. They may not actively participate in team meetings or share information and resources with colleagues. They may have difficulty building positive relationships or resolving conflicts within the team.

Developing:
The staff member is beginning to contribute more actively to team efforts and build positive relationships with colleagues. They share information and resources and offer assistance when needed. However, they may not consistently seek input from others or facilitate effective communication and coordination within the team.

Proficient:
The staff member consistently demonstrates strong collaboration and teamwork skills. They actively contribute to team discussions, seek input and feedback from others, and help to resolve conflicts constructively. They build and maintain positive relationships with colleagues and external stakeholders, and support a culture of collaboration and mutual support within the team.

Advanced:
The staff member is a role model for collaboration and teamwork within the LGU. They proactively build and maintain a wide network of positive working relationships, and are skilled at leading or facilitating cross-functional teams to tackle complex projects. They mentor and coach others to enhance their collaboration skills, and actively promote diversity, equity, and inclusion within the team and across the organization.

Expert:
The staff member is a recognized leader in fostering collaboration and teamwork within the LGU and beyond. They are known for their ability to build and sustain high-performing teams that consistently deliver exceptional results. They are sought out for their expertise in facilitating complex collaborations and resolving challenging team dynamics. They are a champion for creating a culture of trust, mutual support, and continuous learning within the organization.

IMPACT OF FAILING TO USE THE COMPETENCY IN COLLABORATION AND TEAMWORK

Failing to cultivate collaboration and teamwork skills among the municipal officials and staff of the LGU of Paglat can have significant negative consequences for the organization's performance and work environment. Some of the potential impacts include:

- Siloed and fragmented work: Without effective collaboration, staff may work in isolation, leading to duplication of efforts, inefficiencies, and a lack of coordination across departments or functions.

- Reduced innovation and problem-solving: Collaboration is essential for generating new ideas, identifying creative solutions, and tackling complex challenges. Without it, the LGU may struggle to innovate or adapt to changing circumstances.

- Lower staff morale and engagement: Poor collaboration and teamwork can lead to a negative work environment characterized by conflict, mistrust, and disengagement. This can result in higher turnover, absenteeism, and reduced productivity.

- Missed opportunities for learning and growth: Collaboration provides opportunities for staff to learn from each other, share knowledge and skills, and develop their capabilities. Without it, staff may miss out on valuable learning and growth opportunities.

- Weakened relationships with stakeholders: Collaboration is critical for building and maintaining strong relationships with external stakeholders, such as community members, partners, and other government agencies. Failing to collaborate effectively can damage these relationships and undermine the LGU's reputation and effectiveness.

- Suboptimal decision-making: Effective collaboration ensures that diverse perspectives and expertise are considered in decision-making processes. Without it, decisions may be made based on incomplete or biased information, leading to suboptimal outcomes.

- Reduced service quality and citizen satisfaction: Ultimately, a lack of collaboration and teamwork can negatively impact the quality and responsiveness of the services provided by the LGU to its citizens, leading to reduced satisfaction and trust in local government.

IMPROVING THE COMPETENCY IN COLLABORATION AND TEAMWORK

Institutional Level:

- Foster a collaborative culture: Promote a culture that values and rewards collaboration, teamwork, and mutual support. This can be done through leadership messaging, recognition programs, and the creation of opportunities for cross-functional collaboration.

- Provide training and development opportunities: Offer training programs focused on collaboration and teamwork skills, such as effective communication, conflict resolution, and group facilitation. Encourage staff to attend workshops or conferences that expose them to best practices in collaborative work.

- Implement collaborative work practices: Adopt work practices and processes that facilitate collaboration, such as regular team meetings, project debriefs, and knowledge-sharing sessions. Use collaborative technologies and platforms to enable easy communication and coordination among team members.

- Encourage cross-functional collaboration: Create opportunities for staff from different departments or functions to work together on projects or initiatives. This can foster a greater understanding of the interdependencies and synergies across the organization.

- Recognize and reward collaborative behaviors: Celebrate and reward individuals and teams who demonstrate exceptional collaboration and teamwork. This can include public recognition, bonuses, or opportunities for professional development.

- Lead by example: Ensure that senior leaders and managers model collaborative behaviors and prioritize teamwork in their own work. They should actively seek out

opportunities to collaborate with others and demonstrate the value of working together towards common goals.

Individual Level:

- Develop communication and interpersonal skills: Invest in developing one's communication and interpersonal skills, such as active listening, empathy, and assertiveness. These skills are essential for building positive relationships and collaborating effectively with others.

- Seek out opportunities to collaborate: Proactively look for opportunities to collaborate with colleagues, both within and outside one's immediate team. Volunteer for cross-functional projects or initiatives, and offer to assist others when needed.

- Practice inclusive and respectful behaviors: Treat all team members with respect and courtesy, regardless of their position or background. Actively seek out and value diverse perspectives, and create an inclusive environment where everyone feels heard and supported.

- Contribute actively to team efforts: Take initiative in team meetings and discussions, and follow through on commitments and responsibilities. Be willing to share information, resources, and expertise with others to support the team's goals.

- Seek and provide feedback: Regularly seek feedback from colleagues and supervisors on one's collaboration and teamwork skills, and be open to constructive criticism. Provide timely and specific feedback to others to help them improve their own collaboration skills.

- Resolve conflicts constructively: When conflicts or disagreements arise within the team, approach them with a problem-solving mindset. Focus on finding mutually beneficial solutions, and avoid personal attacks or blame.

- Celebrate successes and learn from failures: Take time to recognize and celebrate the team's successes and individual contributions. When failures or setbacks occur, treat them as learning opportunities and work together to identify areas for improvement.

By implementing these strategies at both the institutional and individual levels, the LGU of Paglat can cultivate a strong competency in collaboration and teamwork among its municipal officials and staff, enhancing the organization's ability to deliver effective and responsive services to its citizens.

RESEARCH AND ANALYSIS
Sixth Competency of CSW Practitioners

Research and analysis are critical competencies for municipal officials and staff of the LGU of Paglat to gather and analyze information to inform decision-making and problem-solving. This competency involves the ability to identify relevant information sources, collect and organize data, and use analytical tools and techniques to derive meaningful insights. Here are the indicators for this competency, ranging from simple to complex:

Simple:
- Identifies and accesses relevant information sources
- Collects and organizes data in a systematic manner
- Summarizes key findings from research
- Presents research findings in a clear and concise manner

Intermediate:
- Evaluates the reliability and relevance of information sources
- Uses analytical tools and techniques to identify patterns and trends in data
- Synthesizes information from multiple sources to develop a comprehensive understanding of an issue
- Draws evidence-based conclusions and recommendations from research findings
- Communicates research findings to stakeholders in a way that facilitates decision-making

Complex:
- Designs and conducts original research studies to address complex local governance issues
- Develops innovative data collection and analysis methods to generate new insights
- Integrates qualitative and quantitative data to develop a holistic understanding of an issue
- Anticipates future research needs and proactively gathers relevant information
- Translates research findings into actionable policy recommendations and program designs
- Builds research partnerships with academic institutions, think tanks, and other organizations to expand the LGU's research capacity

RUBRICS FOR MEASURING RESEARCH AND ANALYSIS:

Limited:
The staff member has a limited ability to identify and access relevant information sources. They may struggle to collect and organize data systematically, and their research findings may be incomplete or poorly presented. They rarely use analytical tools or techniques to derive insights from data.

Developing:
The staff member can identify and access relevant information sources, but may not always evaluate their reliability or relevance. They collect and organize data systematically, but may struggle to synthesize information from multiple sources. They use basic analytical tools and techniques to identify patterns in data, but may not always draw evidence-based conclusions or recommendations.

Proficient:
The staff member consistently identifies and accesses relevant and reliable information sources. They skillfully collect, organize, and synthesize data from multiple sources to develop a comprehensive understanding of an issue. They use a range of analytical tools and techniques to identify patterns and trends in data, and draw evidence-based conclusions and recommendations. They effectively communicate research findings to stakeholders to inform decision-making.

Advanced:
The staff member is a skilled researcher who can design and conduct original research studies to address complex local governance issues. They develop innovative data collection and analysis methods to generate new insights, and integrate qualitative and quantitative data to develop a holistic understanding of an issue. They anticipate future research needs and proactively gather relevant information. They translate research findings into actionable policy recommendations and program designs, and build research partnerships to expand the LGU's research capacity.

Expert:
The staff member is a recognized research expert who is sought out for their ability to design and conduct groundbreaking research studies that generate new knowledge and insights. They are at the forefront of developing innovative research methods and tools, and are skilled at integrating diverse types of data to develop a comprehensive understanding of complex issues. They are proactive in identifying and addressing emerging research needs, and are able to translate their findings into transformative policy and program innovations. They are a thought leader in their field, and actively contribute to advancing the research capacity and knowledge base of the local governance sector.

IMPACT OF FAILING TO USE THE COMPETENCY IN RESEARCH AND ANALYSIS

Failing to cultivate research and analysis skills among the municipal officials and staff of the LGU of Paglat can have significant negative consequences for the quality and effectiveness of local governance. Some of the potential impacts include:

- Uninformed decision-making: Without strong research and analysis skills, officials and staff may make decisions based on incomplete, inaccurate, or outdated information. This can lead to poor policy choices, misallocation of resources, and unintended negative consequences for the community.

- Inability to identify and address emerging issues: Effective research and analysis are essential for identifying and understanding emerging local governance challenges and opportunities. Without these skills, the LGU may be caught off guard by new issues or miss out on promising opportunities to improve services and outcomes.

- Lack of innovation: Research and analysis are key drivers of innovation in local governance. Without the ability to generate new insights and ideas through research, the LGU may become stuck in old ways of doing things and fail to adapt to changing needs and circumstances.

- Ineffective program design and implementation: Strong research and analysis skills are essential for designing and implementing effective programs and services that meet the needs of the community. Without these skills, programs may be poorly targeted, underfunded, or fail to achieve their intended outcomes.

- Reduced credibility and trust: The LGU's credibility and trust with stakeholders depend in part on its ability to make evidence-based decisions and demonstrate the impact of its programs and services. Without strong research and analysis skills, the LGU may struggle to build and maintain trust with the community and other stakeholders.

- Missed opportunities for collaboration and learning: Research and analysis can be a powerful tool for collaboration and learning across local government units and with other stakeholders. Without these skills, the LGU may miss out on opportunities to share knowledge, pool resources, and develop innovative solutions to shared challenges.

IMPROVING THE COMPETENCY IN RESEARCH AND ANALYSIS

Institutional Level:

- Develop a research agenda and strategy: Develop a clear research agenda and strategy that aligns with the LGU's strategic priorities and the needs of the community. This can help to focus research efforts, allocate resources effectively, and ensure that research findings are used to inform decision-making and program design.

- Invest in research infrastructure and capacity: Invest in building the LGU's research infrastructure and capacity, including data management systems, research tools and software, and staff training and development. This can help to ensure that the LGU has the resources and expertise needed to conduct high-quality research and analysis.

- Foster a culture of evidence-based decision-making: Foster a culture of evidence-based decision-making throughout the LGU, where research and analysis are valued and used to inform policies, programs, and services. This can involve setting clear expectations for the use of research in decision-making, recognizing and rewarding staff who demonstrate

strong research and analysis skills, and creating opportunities for staff to share and discuss research findings.

- Build research partnerships and networks: Build partnerships and networks with academic institutions, think tanks, and other organizations that can provide research expertise and support. This can help to expand the LGU's research capacity, access new data and methods, and stay up-to-date with the latest research and best practices in local governance.

- Integrate research into planning and budgeting processes: Integrate research and analysis into the LGU's planning and budgeting processes, to ensure that research findings are used to inform resource allocation and program design. This can involve requiring research justifications for budget proposals, setting aside dedicated funding for research activities, and using research findings to evaluate program effectiveness and impact.

Individual Level:

- Develop research and analysis skills: Invest in developing one's research and analysis skills through training, workshops, and self-study. This can involve learning about research design, data collection and analysis methods, statistical analysis, and data visualization techniques.

- Stay up-to-date with research and best practices: Stay up-to-date with the latest research and best practices in local governance and relevant policy areas. This can involve reading academic journals and policy reports, attending conferences and workshops, and participating in professional networks and communities of practice.

- Apply research to real-world problems: Look for opportunities to apply research and analysis skills to real-world problems and challenges facing the LGU and the community. This can involve conducting needs assessments, evaluating program effectiveness, or developing evidence-based policy proposals.

- Collaborate with others: Collaborate with colleagues, stakeholders, and research partners to share knowledge, resources, and expertise. This can involve participating in research teams or working groups, co-authoring research reports or publications, or developing joint research projects or proposals.

- Communicate research findings effectively: Develop skills in communicating research findings effectively to different audiences, including policymakers, practitioners, and the general public. This can involve learning how to write clear and concise research reports, develop engaging data visualizations, and present research findings in a compelling and accessible way.

By implementing these strategies at both the institutional and individual levels, the LGU of Paglat can cultivate a strong competency in research and analysis among its municipal officials and staff, enhancing the organization's ability to make evidence-based decisions, design effective programs and services, and achieve better outcomes for the community.

PROBLEM-SOLVING AND DECISION MAKING
Seventh Competency of CSW Practitioners

Problem-solving and decision making are essential competencies for municipal officials and staff of the LGU of Paglat to effectively address challenges and make informed choices that benefit the community. This competency involves the ability to identify and analyze problems, generate and evaluate potential solutions, and make decisions based on available information and resources. Here are the indicators for this competency, ranging from simple to complex:

Simple:
- Identifies problems and their causes
- Gathers relevant information to inform decision making
- Considers multiple perspectives when analyzing problems
- Makes timely decisions based on available information

Intermediate:
- Analyzes complex problems using structured problem-solving techniques
- Generates creative solutions to address identified problems
- Evaluates potential solutions based on feasibility, effectiveness, and alignment with LGU goals
- Involves relevant stakeholders in the decision-making process
- Communicates decisions and their rationale clearly to stakeholders

Complex:
- Anticipates and proactively addresses potential problems before they occur
- Develops and implements comprehensive problem-solving strategies for complex, multi-faceted issues
- Makes strategic decisions that balance short-term needs with long-term goals and sustainability
- Builds consensus and manages conflicting stakeholder interests in the decision-making process
- Evaluates the effectiveness of implemented solutions and makes adjustments as needed
- Fosters a culture of data-driven decision making and continuous improvement in the LGU

RUBRICS FOR MEASURING PROBLEM-SOLVING AND DECISION MAKING:

Limited:
The staff member struggles to identify problems and their causes, often relying on others to bring issues to their attention. They may make decisions based on incomplete information or fail to consider multiple perspectives. Their problem-solving approach is often reactive and lacks structure or creativity.

Developing:
The staff member can identify problems and gather relevant information, but may struggle to analyze complex issues or generate creative solutions. They consider multiple perspectives but may not always effectively involve stakeholders in the decision-making process. Their decisions are generally sound but may not always align with LGU goals or long-term sustainability.

Proficient:
The staff member consistently identifies and analyzes problems using structured techniques, and generates creative and effective solutions. They involve relevant stakeholders in the decision-making process and communicate decisions clearly. They make strategic decisions that balance short-term needs with long-term goals, and foster a culture of data-driven decision making in their team.

Advanced:
The staff member is proactive in anticipating and addressing potential problems, and develops comprehensive strategies for solving complex, multi-faceted issues. They skillfully build consensus and manage conflicting stakeholder interests, and make decisions that drive long-term sustainability and continuous improvement. They are recognized as a role model for effective problem-solving and decision making in the LGU.

Expert:
The staff member is a recognized authority in problem-solving and decision making, known for their ability to tackle the most complex and sensitive issues facing the LGU. They develop innovative and transformative solutions that set new standards for effectiveness and sustainability. They are a master at building consensus and aligning stakeholders around shared goals, and their decisions consistently deliver exceptional results for the community. They are sought out as a mentor and advisor by others in the LGU and beyond.

IMPACT OF FAILING TO USE THE COMPETENCY IN PROBLEM-SOLVING AND DECISION MAKING

Failing to cultivate problem-solving and decision making skills among the municipal officials and staff of the LGU of Paglat can have severe consequences for the effectiveness and responsiveness of local governance. Some of the potential impacts include:

- Unaddressed or escalating problems: Without effective problem-solving skills, officials and staff may fail to identify or address important issues facing the community, leading to escalating problems that become more difficult and costly to resolve over time.

- Poor or delayed decisions: Lack of structured decision-making processes and skills can result in poor quality decisions that fail to consider important factors or stakeholder

needs. Decisions may also be delayed due to indecisiveness or lack of confidence, leading to missed opportunities or worsening problems.

- Wasted resources: Ineffective problem-solving and decision making can lead to wasted resources, as the LGU may invest time and money in solutions that fail to address the root causes of problems or deliver intended results.

- Reduced trust and credibility: If the community perceives that the LGU is not effectively addressing their needs or making sound decisions on their behalf, trust and credibility in local government can erode, making it more difficult to govern effectively and rally support for important initiatives.

- Missed opportunities for innovation and improvement: Without a proactive and creative approach to problem-solving, the LGU may miss out on opportunities to innovate, improve services, and address emerging challenges and opportunities in the community.

- Increased risk and liability: Poor decision making can expose the LGU to increased risk and liability, particularly if decisions are made without proper consideration of legal, financial, or safety implications.

- Low staff morale and performance: If staff do not feel equipped or empowered to solve problems and make decisions effectively, morale and performance can suffer, leading to reduced productivity, increased turnover, and difficulty attracting and retaining talented staff.

IMPROVING THE COMPETENCY IN PROBLEM-SOLVING AND DECISION MAKING

Institutional Level:

- Provide training and development opportunities: Invest in training programs that build problem-solving and decision-making skills among staff at all levels of the LGU. This can include workshops on structured problem-solving techniques, decision-making frameworks, and data analysis and interpretation.

- Establish clear decision-making processes and criteria: Develop and communicate clear processes and criteria for decision-making in the LGU, to ensure that decisions are made consistently, transparently, and in alignment with organizational goals and values.

- Foster a culture of innovation and continuous improvement: Encourage and reward staff for identifying and solving problems proactively, and for suggesting innovative ideas for improving services and processes. Celebrate successes and learn from failures in a constructive way.

- Provide access to data and information: Ensure that staff have access to the data and information they need to analyze problems and make informed decisions. Invest in systems and tools that facilitate data collection, analysis, and sharing across the organization.

- Encourage collaboration and stakeholder engagement: Foster a collaborative approach to problem-solving and decision making, encouraging staff to work across departments and engage with relevant stakeholders to gather input and build consensus around solutions.

- Model effective problem-solving and decision making: Ensure that senior leaders in the LGU model effective problem-solving and decision-making behaviors, and create opportunities for staff to learn from and emulate these behaviors.

Individual Level:

- Develop a structured approach to problem-solving: Learn and apply structured problem-solving techniques, such as root cause analysis, decision trees, and cost-benefit analysis, to analyze problems and evaluate potential solutions systematically.

- Gather and analyze relevant data: Develop the habit of gathering and analyzing relevant data to inform problem-solving and decision making. Learn to use data analysis tools and techniques to derive insights and support arguments.

- Consider multiple perspectives: Actively seek out and consider multiple perspectives when analyzing problems and making decisions. Engage with colleagues, stakeholders, and subject matter experts to gather diverse insights and challenge assumptions.

- Communicate decisions effectively: Develop the skills to communicate decisions clearly and persuasively, both verbally and in writing. Learn to articulate the rationale behind decisions, address concerns and objections, and build support for implementation.

- Learn from successes and failures: Cultivate a growth mindset that views successes and failures as opportunities for learning and improvement. Regularly reflect on the outcomes of problem-solving and decision-making efforts, and identify lessons learned that can inform future approaches.

- Stay current with best practices and emerging trends: Keep abreast of best practices and emerging trends in problem-solving and decision making, both in the public sector and beyond. Attend conferences, read relevant publications, and participate in professional networks to expand knowledge and skills.

By implementing these strategies at both the institutional and individual levels, the LGU of Paglat can cultivate a strong competency in problem-solving and decision making among its

municipal officials and staff, enhancing the organization's ability to address challenges effectively and make sound decisions that benefit the community.

ATTENTION TO DETAILS AND QUALITY
Eighth Competency of CSW Practitioners

Attention to details and quality is a crucial competency for municipal officials and staff of the LGU of Paglat to ensure that their work is accurate, thorough, and of high quality. This competency involves the ability to focus on the specifics of a task, maintain accuracy in documentation and communication, and consistently deliver work that meets or exceeds expectations. Here are the indicators for this competency, ranging from simple to complex:

Simple:
- Consistently produces work that is free from errors and omissions
- Follows instructions and procedures accurately and completely
- Pays close attention to the details of a task or project
- Maintains organized and accurate records and documentation

Intermediate:
- Identifies and corrects errors or inconsistencies in work products
- Ensures that work meets established quality standards and guidelines
- Provides thorough and accurate information in communications and reports
- Anticipates potential issues or challenges and addresses them proactively
- Seeks feedback and input to improve the quality of work

Complex:
- Develops and implements quality control processes and procedures
- Conducts thorough reviews and audits to ensure compliance with quality standards
- Identifies opportunities for continuous improvement in work processes and products
- Provides guidance and mentorship to others to promote attention to detail and quality
- Represents the LGU in external quality assurance and accreditation processes
- Fosters a culture of excellence and attention to detail within the LGU

RUBRICS FOR MEASURING ATTENTION TO DETAILS AND QUALITY:

Limited:
The staff member often produces work with errors or omissions, and may struggle to follow instructions or procedures accurately. They may overlook important details or fail to maintain organized and accurate records. Their work often fails to meet established quality standards or expectations.

Developing:
The staff member produces work that is generally accurate and complete, but may occasionally overlook details or make minor errors. They follow instructions and procedures, but may not always anticipate potential issues or seek feedback to improve their work. Their work meets basic quality standards but may not consistently exceed expectations.

Proficient:
The staff member consistently produces high-quality work that is free from errors and omissions. They pay close attention to details and follow instructions and procedures accurately and completely. They maintain organized and accurate records and documentation, and proactively seek feedback to improve their work. Their work meets or exceeds established quality standards and expectations.

Advanced:
The staff member is a role model for attention to detail and quality, consistently producing exceptional work that sets the standard for the LGU. They develop and implement effective quality control processes and procedures, and conduct thorough reviews to ensure compliance with standards. They identify opportunities for continuous improvement and provide guidance and mentorship to others to promote a culture of excellence and attention to detail.

Expert:
The staff member is a recognized authority in attention to detail and quality, known for their meticulous and flawless work. They are sought out by others for their expertise in quality assurance and continuous improvement. They represent the LGU in external accreditation processes and are a driving force behind the LGU's reputation for excellence. They inspire and empower others to achieve the highest levels of accuracy, thoroughness, and quality in their work.

IMPACT OF FAILING TO USE THE COMPETENCY IN ATTENTION TO DETAILS AND QUALITY

Failing to cultivate attention to detail and quality among the municipal officials and staff of the LGU of Paglat can have significant negative consequences for the effectiveness and reputation of the LGU. Some of the potential impacts include:

- Errors and omissions in important documents and communications, leading to confusion, misunderstandings, or legal liabilities for the LGU.

- Poor quality of services and outputs, resulting in dissatisfaction and complaints from citizens and stakeholders.

- Inefficiencies and waste of resources due to rework, corrections, or delays caused by inaccurate or incomplete work.

- Damage to the LGU's reputation and credibility, as stakeholders lose trust in the LGU's ability to deliver high-quality services and products.

- Missed opportunities for funding, partnerships, or recognition, as the LGU fails to meet the quality standards or expectations of external entities.

- Increased risk of accidents, injuries, or legal liabilities, as attention to safety and compliance details is compromised.

- Difficulty in achieving the LGU's strategic goals and objectives, as poor quality work undermines progress and effectiveness.

- Low staff morale and productivity, as employees become frustrated with the lack of attention to detail and quality in their work environment.

IMPROVING THE COMPETENCY IN ATTENTION TO DETAILS AND QUALITY

Institutional Level:

- Establish clear quality standards and guidelines: Develop and communicate clear standards and guidelines for quality work across all departments and functions of the LGU. These should cover aspects such as accuracy, completeness, timeliness, and compliance with relevant laws and regulations.

- Implement quality control and assurance processes: Establish formal processes for reviewing, testing, and certifying the quality of the LGU's services, products, and communications. This can include peer reviews, supervisory checks, or external audits, depending on the nature and complexity of the work.

- Provide training and resources for quality improvement: Invest in training programs and resources that help staff develop their skills and knowledge in areas such as proofreading, data analysis, or quality management. Encourage staff to pursue relevant certifications or qualifications that demonstrate their commitment to quality.

- Recognize and reward attention to detail and quality: Celebrate and reward individuals and teams who consistently demonstrate exceptional attention to detail and deliver high-quality work. This can include public recognition, bonuses, or opportunities for advancement, depending on the LGU's reward systems.

- Foster a culture of continuous improvement: Encourage a mindset of continuous improvement, where staff are encouraged to identify and suggest ways to enhance the quality and efficiency of the LGU's work processes and outputs. Provide channels for staff to share their ideas and feedback, and act on promising suggestions.

Individual Level:

- Develop a systematic approach to work: Establish a systematic and organized approach to managing one's work, using tools such as checklists, templates, or project

plans. This can help ensure that all necessary steps and details are addressed, and minimize the risk of errors or omissions.

- Practice active listening and reading: Pay close attention when receiving instructions, feedback, or information related to one's work. Take notes, ask clarifying questions, and repeat back key points to ensure accurate understanding and retention of details.

- Double-check work before submission: Build in time for reviewing and double-checking one's work before submitting or finalizing it. Use techniques such as proofreading, data validation, or peer review to catch and correct any errors or inconsistencies.

- Seek feedback and learn from mistakes: Proactively seek feedback from supervisors, colleagues, or clients on the quality and effectiveness of one's work. When mistakes or areas for improvement are identified, treat them as learning opportunities and take steps to avoid similar issues in the future.

- Stay current with industry standards and best practices: Keep abreast of the latest quality standards, guidelines, and best practices relevant to one's field of work. Attend training sessions, workshops, or conferences that provide insights and tools for enhancing quality and attention to detail.

By implementing these strategies at both the institutional and individual levels, the LGU of Paglat can cultivate a strong competency in attention to detail and quality among its municipal officials and staff, enhancing the effectiveness, efficiency, and reputation of the LGU in serving its constituents.

TIME AND ATTENTION MANAGEMENT
Ninth Competency of CSW Practitioners

Time and attention management is a crucial competency for municipal officials and staff of the LGU of Paglat to effectively prioritize tasks, allocate time efficiently, and maintain focus on important responsibilities. This competency involves the ability to plan and organize work, set realistic deadlines, and minimize distractions to maximize productivity. Here are the indicators for this competency, ranging from simple to complex:

Simple:
- Consistently meets deadlines and completes tasks on time
- Maintains an organized and up-to-date calendar or schedule
- Prioritizes tasks based on importance and urgency
- Minimizes distractions and stays focused on the task at hand

Intermediate:
- Anticipates potential obstacles or delays and adjusts plans accordingly
- Delegates tasks appropriately to optimize team productivity
- Uses time management tools and techniques to enhance efficiency
- Regularly reviews and improves time management practices
- Communicates progress and any changes to timelines effectively to stakeholders

Complex:
- Develops and implements comprehensive project plans with realistic timelines and resource allocation
- Leads and coordinates multiple projects or initiatives simultaneously
- Coaches and mentors others on effective time and attention management strategies
- Analyzes and optimizes organizational processes to improve overall efficiency
- Fosters a culture of accountability and productivity within the LGU
- Represents the LGU in high-stakes negotiations or discussions involving complex timelines and deliverables

RUBRICS FOR MEASURING TIME AND ATTENTION MANAGEMENT:

Limited:
The staff member struggles to meet deadlines consistently and often fails to complete tasks on time. They have difficulty prioritizing tasks and may become easily distracted or overwhelmed. Their lack of organization and time management skills negatively impacts their productivity and the team's performance.

Developing:
The staff member generally meets deadlines and completes tasks on time, but may occasionally struggle with prioritization or time allocation. They maintain a basic level of organization but may not always anticipate potential obstacles or adjust plans proactively.

They are beginning to use time management tools and techniques but may not apply them consistently.

Proficient:
The staff member consistently demonstrates strong time and attention management skills, meeting deadlines and completing tasks efficiently. They prioritize tasks effectively, minimize distractions, and maintain a well-organized schedule. They anticipate potential challenges and adjust plans accordingly, communicating any changes to stakeholders. They regularly use time management tools and techniques to enhance their productivity and support their team's performance.

Advanced:
The staff member excels in managing time and attention, consistently delivering high-quality work within deadlines. They are skilled at developing and implementing comprehensive project plans, allocating resources effectively, and leading multiple initiatives simultaneously. They serve as a role model and mentor for others, coaching them on effective time management strategies. They continuously analyze and optimize processes to improve organizational efficiency and foster a culture of accountability and productivity.

Expert:
The staff member is a recognized authority in time and attention management, known for their exceptional ability to prioritize, plan, and execute complex projects and initiatives. They are sought out by others for their expertise in optimizing processes, managing resources, and delivering results within challenging timelines. They are skilled negotiators and communicators, able to represent the LGU effectively in high-stakes discussions involving complex deliverables. They are a driving force behind the LGU's culture of efficiency, productivity, and continuous improvement.

IMPACT OF FAILING TO USE THE COMPETENCY IN TIME AND ATTENTION MANAGEMENT

Failing to cultivate time and attention management skills among the municipal officials and staff of the LGU of Paglat can have significant negative consequences for the organization's performance and effectiveness. Some of the potential impacts include:

- Missed deadlines and delays: Without effective time management, staff may consistently fail to meet deadlines, causing delays in project completion, service delivery, and decision-making. This can lead to dissatisfied constituents, missed opportunities, and damage to the LGU's reputation.

- Poor quality of work: When staff are unable to manage their time and attention effectively, the quality of their work may suffer. They may rush to complete tasks at the last minute, leading to errors, oversights, or subpar results.

- Inefficient use of resources: Poor time management can result in the misallocation of resources, such as staff time, funds, or materials. This can lead to wasted resources, increased costs, and reduced overall efficiency.

- Increased stress and burnout: When staff are constantly struggling to meet deadlines and manage competing priorities, they may experience high levels of stress and burnout. This can lead to decreased job satisfaction, increased absenteeism, and higher turnover rates.

- Reduced collaboration and teamwork: Ineffective time management can hinder collaboration and teamwork, as staff may struggle to coordinate their efforts, meet shared deadlines, or contribute equally to projects. This can lead to tension, conflict, and a breakdown in communication among team members.

- Missed opportunities for innovation and improvement: When staff are constantly firefighting and struggling to keep up with day-to-day tasks, they may have little time or energy to devote to innovation, process improvement, or strategic planning. This can limit the LGU's ability to adapt to changing circumstances, seize new opportunities, or address emerging challenges.

- Diminished public trust and confidence: If the LGU consistently fails to deliver services, complete projects, or make decisions in a timely manner, public trust and confidence in the organization may erode. This can make it more difficult for the LGU to secure funding, engage constituents, or implement important initiatives.

IMPROVING THE COMPETENCY IN TIME AND ATTENTION MANAGEMENT

Institutional Level:

- Provide training and development opportunities: Offer workshops, seminars, or courses on time management, project planning, and productivity enhancement techniques. Ensure that these opportunities are accessible to all staff and tailored to the specific needs and challenges of the LGU.

- Implement standardized project management processes: Establish clear, standardized processes for project planning, execution, and monitoring across the LGU. This can include the use of project management software, templates, or methodologies to ensure consistency and efficiency.

- Foster a culture of accountability and results: Encourage a work culture that values accountability, efficiency, and results. This can involve setting clear performance expectations, recognizing and rewarding staff who demonstrate strong time management skills, and addressing performance issues related to poor time management.

- Provide necessary tools and resources: Ensure that staff have access to the tools, technology, and resources they need to manage their time and attention effectively. This can include time tracking software, project management tools, or productivity apps.

- Encourage work-life balance: Promote a healthy work-life balance by encouraging staff to set boundaries, take breaks, and prioritize self-care. This can help reduce stress, improve focus, and enhance overall productivity.

- Lead by example: Ensure that senior leaders and managers model effective time management behaviors and prioritize efficiency and productivity in their own work. They should set clear expectations for their teams and provide guidance and support as needed.

Individual Level:

- Set clear goals and priorities: Regularly set clear, specific, and achievable goals for one's work, and prioritize tasks based on their importance and urgency. Use tools like the Eisenhower Matrix or the ABC method to categorize and prioritize tasks.

- Use a calendar or schedule: Maintain a detailed and up-to-date calendar or schedule to plan and track one's work. Block out time for specific tasks, meetings, or projects, and ensure that the schedule is realistic and allows for some flexibility.

- Break tasks into smaller, manageable steps: When faced with large or complex tasks, break them down into smaller, more manageable steps. This can help make the work feel less overwhelming and allow for a sense of progress and accomplishment.

- Minimize distractions: Identify and minimize common distractions, such as unnecessary meetings, social media, or chatty coworkers. Use techniques like the Pomodoro method or time-blocking to maintain focus and avoid interruptions.

- Delegate and collaborate effectively: Learn to delegate tasks appropriately to others, based on their skills, availability, and development needs. Collaborate effectively with team members to share the workload and ensure that projects are completed efficiently.

- Continuously review and improve: Regularly review one's time management practices and seek ways to improve efficiency and productivity. This can involve tracking one's time, identifying areas of waste or inefficiency, and experimenting with new tools or techniques.

- Engage in professional development: Proactively seek out opportunities to learn and develop one's time management and productivity skills. This can include attending workshops, reading books or articles, or seeking mentorship from colleagues who excel in this area.

By implementing these strategies at both the institutional and individual levels, the LGU of Paglat can cultivate a strong competency in time and attention management among its municipal officials and staff, enhancing the organization's ability to deliver efficient and effective services to its constituents.

FLEXIBILITY AND ADAPTABILITY
Tenth Competency of CSW Practitioners

Flexibility and adaptability are crucial competencies for municipal officials and staff of the LGU of Paglat to effectively navigate and respond to changing circumstances, new challenges, and diverse stakeholder needs. This competency involves the ability to adjust one's approach, thinking, and behavior to adapt to new situations and demands. Here are the indicators for this competency, ranging from simple to complex:

Simple:
- Demonstrates openness to new ideas and approaches
- Adapts to changes in work processes or procedures
- Maintains productivity and positive attitude in the face of change or uncertainty
- Learns new skills or knowledge to meet changing job requirements

Intermediate:
- Proactively seeks out opportunities to learn and grow in response to changing needs
- Develops contingency plans to manage risks and uncertainties
- Helps others to adapt to change by providing guidance and support
- Modifies communication style to effectively engage with diverse stakeholders
- Identifies areas where existing processes or policies need to be adapted to meet evolving needs

Complex:
- Anticipates future changes and proactively develops strategies to address them
- Leads organizational change initiatives to improve the LGU's agility and responsiveness
- Fosters a culture of continuous learning and adaptability within the LGU
- Develops and implements innovative solutions to complex, novel challenges
- Builds strategic partnerships and collaborations to enhance the LGU's flexibility and resilience
- Represents the LGU effectively in complex, dynamic stakeholder environments

RUBRICS FOR MEASURING FLEXIBILITY AND ADAPTABILITY:

Limited:
The staff member struggles to adapt to changes in work processes or procedures, often resisting new ideas or approaches. They may become easily overwhelmed or frustrated in the face of change or uncertainty, and their productivity and attitude may suffer as a result. They may be reluctant to learn new skills or knowledge, even when it is necessary to meet changing job requirements.

Developing:

The staff member demonstrates some openness to new ideas and approaches, and is generally able to adapt to changes in work processes or procedures. They maintain a relatively positive attitude in the face of change or uncertainty, although they may experience some stress or discomfort. They are willing to learn new skills or knowledge as needed, but may not proactively seek out opportunities for growth and development.

Proficient:
The staff member consistently demonstrates flexibility and adaptability, proactively seeking out opportunities to learn and grow in response to changing needs. They develop contingency plans to manage risks and uncertainties, and effectively modify their communication style to engage with diverse stakeholders. They identify areas where existing processes or policies need to be adapted, and work collaboratively to develop and implement solutions.

Advanced:
The staff member is a proactive and strategic thinker who anticipates future changes and develops innovative strategies to address them. They are skilled at leading organizational change initiatives and fostering a culture of continuous learning and adaptability within the LGU. They build strategic partnerships and collaborations to enhance the LGU's flexibility and resilience, and are able to represent the LGU effectively in complex, dynamic stakeholder environments.

Expert:
The staff member is a recognized authority in flexibility and adaptability, known for their exceptional ability to navigate and thrive in complex, uncertain, and rapidly changing environments. They are a visionary leader who develops and implements transformative strategies that fundamentally enhance the LGU's agility, resilience, and responsiveness. They are sought out as a mentor, advisor, and partner by others within and outside the LGU, and are a driving force behind the LGU's culture of innovation and continuous improvement.

IMPACT OF FAILING TO USE THE COMPETENCY IN FLEXIBILITY AND ADAPTABILITY

Failing to cultivate flexibility and adaptability among the municipal officials and staff of the LGU of Paglat can have significant negative consequences for the organization's effectiveness, resilience, and ability to serve its constituents. Some of the potential impacts include:

- Resistance to change: Without flexibility and adaptability, officials and staff may resist necessary changes to processes, policies, or strategies, even when these changes are critical for the LGU's success. This can lead to stagnation, inefficiency, and a failure to keep pace with evolving needs and expectations.

- Missed opportunities: Inflexible and rigid thinking can cause the LGU to miss out on valuable opportunities for innovation, growth, and improvement. Officials and staff may be

unable to recognize or capitalize on emerging trends, technologies, or partnerships that could enhance the LGU's services and impact.

- Inability to respond to crises: In the face of unexpected crises or challenges, such as natural disasters, economic downturns, or public health emergencies, a lack of flexibility and adaptability can severely hamper the LGU's ability to respond effectively. This can lead to delayed or inadequate service delivery, public frustration and mistrust, and even loss of life or property.

- Difficulty serving diverse constituents: As the needs, preferences, and demographics of Paglat's constituents change over time, inflexible approaches to service delivery and communication can result in a growing disconnect between the LGU and the people it serves. This can lead to reduced satisfaction, engagement, and support from the community.

- Strained partnerships and collaborations: Inflexibility can make it difficult for the LGU to effectively collaborate with other organizations, sectors, or levels of government. This can limit the LGU's ability to leverage resources, expertise, and influence to address complex challenges and achieve its goals.

- High stress and burnout: Constantly struggling to cope with change and uncertainty can take a heavy toll on the well-being and productivity of LGU officials and staff. Without the skills and mindset to adapt and thrive in dynamic environments, they may experience high levels of stress, frustration, and burnout, leading to reduced job satisfaction, absenteeism, and turnover.

- Difficulty attracting and retaining talent: In an increasingly dynamic and competitive job market, organizations that are perceived as inflexible and resistant to change may struggle to attract and retain top talent. This can limit the LGU's ability to build a skilled, diverse, and innovative workforce that can drive long-term success and impact.

IMPROVING THE COMPETENCY IN FLEXIBILITY AND ADAPTABILITY

Institutional Level:

- Foster a culture of continuous learning: Encourage and support ongoing learning and development opportunities for all officials and staff, including training in change management, resilience, and adaptive leadership. Celebrate and reward individuals and teams who demonstrate a commitment to continuous learning and growth.

- Embrace experimentation and innovation: Create an environment that encourages calculated risk-taking, experimentation, and innovation. Provide resources and support for officials and staff to pilot new ideas, learn from failures, and scale up successful initiatives. Celebrate and showcase examples of innovation and adaptability across the LGU.

- Build diverse and inclusive teams: Actively recruit, develop, and promote a diverse range of individuals with different backgrounds, perspectives, and skill sets. Foster an inclusive culture where different viewpoints are valued and leveraged to enhance the LGU's flexibility and responsiveness to diverse constituent needs.

- Develop agile processes and structures: Review and streamline the LGU's processes, policies, and structures to enable greater flexibility and adaptability. Adopt agile project management and decision-making frameworks that allow for rapid iteration, feedback, and course correction in response to changing circumstances.

- Invest in technology and data: Leverage technology and data to enhance the LGU's ability to anticipate, monitor, and respond to changing needs and trends. Invest in tools and platforms that enable real-time data collection, analysis, and sharing across departments and with external partners.

- Cultivate strategic partnerships: Build and maintain a diverse network of strategic partnerships with other LGUs, national government agencies, civil society organizations, academic institutions, and private sector entities. Leverage these partnerships to access new resources, expertise, and approaches that can enhance the LGU's flexibility and resilience.

Individual Level:

- Develop a growth mindset: Cultivate a mindset that embraces change, uncertainty, and continuous learning as opportunities for growth and development. Reframe challenges and setbacks as chances to learn, adapt, and improve, rather than as threats or failures.

- Proactively seek out learning opportunities: Take initiative to identify and pursue learning opportunities that can enhance one's skills, knowledge, and adaptability. This can include attending workshops, conferences, or online courses, reading relevant books and articles, or seeking out mentors or coaches.

- Practice active listening and empathy: Develop strong active listening and empathy skills to better understand and respond to the diverse needs, perspectives, and concerns of colleagues, partners, and constituents. Use these skills to build trust, resolve conflicts, and find mutually beneficial solutions in the face of change or disagreement.

- Experiment with new approaches: Be willing to experiment with new ideas, methods, or technologies, even if they are outside one's comfort zone. Start small, test and refine approaches based on feedback and data, and scale up successful experiments over time.

- Develop resilience and stress management skills: Cultivate personal resilience and stress management skills to better cope with the challenges and pressures of change and

uncertainty. This can include practicing mindfulness, setting realistic expectations, maintaining a healthy work-life balance, and seeking support from colleagues, friends, or professionals when needed.

- Collaborate and network actively: Actively seek out opportunities to collaborate with colleagues across departments, as well as with external partners and stakeholders. Build and maintain a diverse professional network that can provide new ideas, resources, and support in the face of change or challenges.

By implementing these strategies at both the institutional and individual levels, the LGU of Paglat can cultivate a strong competency in flexibility and adaptability among its municipal officials and staff, enhancing the organization's ability to anticipate, navigate, and thrive in an increasingly complex and dynamic environment.

EMOTIONAL INTELLIGENCE AND ACCOUNTABILITY
Eleventh Competency of CSW Practitioners

Emotional intelligence and accountability are crucial competencies for municipal officials and staff of the LGU of Paglat to effectively manage their emotions, build positive relationships, and take responsibility for their actions and decisions. This competency involves self-awareness, self-regulation, empathy, and a commitment to being accountable for one's work and its impact on others. Here are the indicators for this competency, ranging from simple to complex:

Simple:
- Demonstrates self-awareness of one's emotions and their impact on others
- Manages one's emotions effectively in challenging situations
- Takes responsibility for one's actions and decisions
- Follows through on commitments and meets deadlines consistently

Intermediate:
- Demonstrates empathy and understanding of others' emotions and perspectives
- Builds and maintains positive relationships with colleagues, stakeholders, and constituents
- Proactively seeks feedback and takes action to improve one's performance
- Holds oneself and others accountable for meeting goals and standards
- Communicates openly and honestly about one's work and its impact

Complex:
- Coaches and mentors others to develop their emotional intelligence and accountability
- Fosters a culture of emotional intelligence and accountability within the LGU
- Anticipates and addresses potential emotional or relational challenges in the workplace
- Takes ownership of complex or sensitive issues and works to resolve them constructively
- Models a high level of integrity, transparency, and accountability in all aspects of one's work
- Represents the LGU with emotional intelligence and accountability in high-stakes situations

RUBRICS FOR MEASURING EMOTIONAL INTELLIGENCE AND ACCOUNTABILITY:

Limited:
The staff member struggles to manage their emotions effectively, often reacting impulsively or defensively in challenging situations. They may lack self-awareness of their impact on others and struggle to build positive relationships. They often fail to take responsibility for

their actions or follow through on commitments, and may resist feedback or accountability measures.

Developing:
The staff member demonstrates some self-awareness of their emotions and tries to manage them in most situations, but may still struggle in highly stressful or challenging contexts. They are beginning to build positive relationships and show empathy for others, but may not always communicate effectively or proactively. They generally take responsibility for their work but may need reminders or support to consistently meet goals and deadlines.

Proficient:
The staff member consistently demonstrates a high level of emotional intelligence, managing their emotions effectively and communicating with empathy and understanding. They build and maintain strong relationships with colleagues and stakeholders, and proactively seek feedback to improve their performance. They hold themselves and others accountable for meeting goals and standards, and communicate openly and honestly about their work and its impact.

Advanced:
The staff member is a role model for emotional intelligence and accountability, consistently demonstrating self-awareness, empathy, and integrity in their work. They coach and mentor others to develop these competencies, and foster a culture of emotional intelligence and accountability within their team or department. They anticipate and address potential emotional or relational challenges proactively, and take ownership of complex or sensitive issues to resolve them constructively.

Expert:
The staff member is a recognized leader in emotional intelligence and accountability, known for their exceptional ability to manage emotions, build relationships, and drive results with integrity and transparency. They are sought out as a coach, mentor, and advisor by others within and outside the LGU, and are a key influencer in shaping the organization's culture and reputation. They represent the LGU with distinction in high-stakes situations, and are trusted to handle the most complex and sensitive issues with skill and accountability.

IMPACT OF FAILING TO USE THE COMPETENCY IN EMOTIONAL INTELLIGENCE AND ACCOUNTABILITY

Failing to cultivate emotional intelligence and accountability among the municipal officials and staff of the LGU of Paglat can have significant negative consequences for the organization's performance, reputation, and ability to serve its constituents effectively. Some of the potential impacts include:

- Poor decision-making: Officials and staff who lack emotional intelligence may make impulsive or reactive decisions based on their emotions rather than facts and analysis. This

can lead to suboptimal outcomes, unintended consequences, and damage to the LGU's credibility and effectiveness.

- Strained relationships: Without the ability to manage emotions and communicate with empathy, officials and staff may struggle to build and maintain positive relationships with colleagues, stakeholders, and constituents. This can lead to conflict, mistrust, and a breakdown in collaboration and teamwork.

- Lack of accountability: If officials and staff do not take responsibility for their actions and decisions, or fail to follow through on commitments, it can erode trust and confidence in the LGU's ability to deliver results. This can lead to a culture of blame, avoidance, and low performance.

- Reduced employee engagement and retention: A work environment that lacks emotional intelligence and accountability can be stressful, demotivating, and toxic for employees. This can lead to high turnover, absenteeism, and low morale, which can further undermine the LGU's capacity and effectiveness.

- Reputational damage: If the LGU becomes known for a lack of emotional intelligence and accountability among its officials and staff, it can damage its reputation and credibility with constituents, partners, and other stakeholders. This can make it harder to secure funding, partnerships, and support for important initiatives.

- Missed opportunities for growth and innovation: Without a culture of emotional intelligence and accountability, the LGU may struggle to adapt to changing circumstances, learn from failures, or pursue new opportunities for growth and innovation. This can limit its ability to meet the evolving needs and expectations of its constituents.

IMPROVING THE COMPETENCY IN EMOTIONAL INTELLIGENCE AND ACCOUNTABILITY

Institutional Level:

- Provide training and development opportunities: Offer workshops, seminars, and coaching programs focused on developing emotional intelligence and accountability skills among officials and staff. These can cover topics such as self-awareness, emotional regulation, empathy, communication, and personal responsibility.

- Integrate emotional intelligence and accountability into performance management: Include these competencies in job descriptions, performance evaluations, and promotion criteria to signal their importance and encourage staff to develop and demonstrate them consistently.

- Foster a culture of openness, trust, and psychological safety: Create an environment where staff feel comfortable expressing their emotions, giving and receiving feedback, and

taking risks without fear of blame or retaliation. Model vulnerability and accountability as a leader, and encourage open and honest communication at all levels.

- Recognize and reward emotional intelligence and accountability: Celebrate and showcase examples of staff who demonstrate exceptional emotional intelligence and accountability in their work, through awards, public recognition, or other incentives. Use these examples to reinforce the importance of these competencies and inspire others to emulate them.

- Address emotional intelligence and accountability issues promptly and constructively: When staff struggle with these competencies or engage in counterproductive behaviors, address the issues promptly and constructively through coaching, feedback, and performance improvement plans. Hold staff accountable for their actions and decisions, while also providing support and resources to help them develop and improve.

Individual Level:

- Develop self-awareness: Regularly reflect on your emotions, triggers, and patterns of behavior, and seek feedback from others to gain insight into how you are perceived. Use tools such as personality assessments, journaling, or mindfulness practices to deepen your self-awareness and identify areas for growth.

- Practice emotional regulation: Develop strategies for managing your emotions in challenging situations, such as deep breathing, cognitive reframing, or taking breaks. Avoid reacting impulsively or defensively, and instead respond thoughtfully and constructively to conflicts or criticisms.

- Cultivate empathy: Actively listen to others and seek to understand their perspectives, feelings, and needs. Practice putting yourself in their shoes and communicating with compassion and respect, even when you disagree. Look for opportunities to support and encourage others, and build positive relationships based on trust and mutual understanding.

- Take ownership and accountability: Take responsibility for your actions, decisions, and results, and avoid blaming others or making excuses. Follow through on your commitments and communicate proactively if you encounter obstacles or delays. Seek feedback on your performance and use it to identify areas for improvement and growth.

- Communicate openly and honestly: Express your thoughts, feelings, and concerns clearly and respectfully, and encourage others to do the same. Avoid gossip, triangulation, or passive-aggressive behavior, and instead address issues directly and constructively. Be transparent about your goals, expectations, and limitations, and work collaboratively to find mutually beneficial solutions.

- Model integrity and ethical behavior: Act with honesty, fairness, and integrity in all your dealings, and hold yourself to high ethical standards. Avoid conflicts of interest or improper use of resources, and speak up if you witness unethical or illegal behavior. Model the values and behaviors you expect from others, and be a positive influence on the culture and reputation of the LGU.

By implementing these strategies at both the institutional and individual levels, the LGU of Paglat can cultivate a strong competency in emotional intelligence and accountability among its municipal officials and staff, enhancing the organization's ability to deliver effective and responsive services to its constituents while building trust and credibility with stakeholders.

ETHICS AND INTEGRITY
Twelfth Competency of CSW Practitioners

Ethics and integrity are fundamental competencies for municipal officials and staff of the LGU of Paglat to maintain public trust, ensure fair and equitable service delivery, and uphold the principles of good governance. This competency involves adhering to moral and ethical principles, demonstrating honesty and consistency in one's actions, and making decisions that prioritize the public interest. Here are the indicators for this competency, ranging from simple to complex:

Simple:
- Demonstrates honesty and truthfulness in all interactions
- Follows ethical guidelines and codes of conduct consistently
- Treats all individuals with respect and fairness
- Maintains confidentiality of sensitive information

Intermediate:
- Identifies and addresses potential ethical dilemmas proactively
- Ensures that decisions and actions align with the LGU's values and principles
- Promotes a culture of integrity and accountability within the team or department
- Seeks guidance when faced with complex ethical situations
- Communicates the importance of ethics and integrity to stakeholders

Complex:
- Develops and implements policies and procedures to promote ethical behavior
- Investigates and addresses breaches of ethical conduct fairly and consistently
- Serves as a role model for ethical leadership and decision-making
- Fosters a culture of transparency and public accountability across the LGU
- Engages stakeholders in dialogue about ethical issues and public trust
- Represents the LGU with the highest standards of integrity in all external interactions

RUBRICS FOR MEASURING ETHICS AND INTEGRITY:

Limited:
The staff member demonstrates a lack of understanding or commitment to ethical principles and behaviors. They may engage in dishonest or unethical practices, such as misusing resources, breaching confidentiality, or showing favoritism. They fail to consider the ethical implications of their decisions and actions, and may damage public trust in the LGU.

Developing:
The staff member generally adheres to ethical guidelines and codes of conduct, but may struggle in complex or ambiguous situations. They treat individuals with respect and maintain confidentiality, but may not always consider the broader ethical implications of

their actions. They are receptive to guidance on ethical issues, but may not proactively seek it out.

Proficient:
The staff member consistently demonstrates honesty, integrity, and ethical behavior in their work. They proactively identify and address potential ethical dilemmas, and ensure that their decisions align with the LGU's values. They promote a culture of integrity within their team and communicate the importance of ethics to stakeholders. They seek guidance when faced with complex ethical situations and serve as a positive role model for others.

Advanced:
The staff member is a recognized leader in promoting ethics and integrity within the LGU. They develop and implement policies and procedures to foster ethical behavior, and investigate and address breaches of conduct fairly and consistently. They actively engage stakeholders in dialogue about ethical issues and public trust, and represent the LGU with the highest standards of integrity in all interactions. They are sought out as an advisor and mentor on ethical decision-making.

Expert:
The staff member is a visionary leader who transforms the ethical culture of the LGU and sets new standards for integrity in public service. They design innovative programs and initiatives to embed ethics and accountability into all aspects of the organization's work, and inspire others to uphold the highest moral principles. They are a respected voice on ethics and integrity in the wider community, and are called upon to provide guidance and leadership on complex ethical issues at the regional or national level. Their unwavering commitment to doing the right thing, even in the face of adversity, is a model for all public servants.

IMPACT OF FAILING TO USE THE COMPETENCY IN ETHICS AND INTEGRITY

Failing to cultivate ethics and integrity among the municipal officials and staff of the LGU of Paglat can have severe and far-reaching consequences for the organization, the community, and the principles of good governance. Some of the potential impacts include:

- Erosion of public trust: When officials and staff engage in unethical or corrupt practices, such as misusing funds, abusing power, or showing favoritism, it erodes public trust in the LGU and government as a whole. This can lead to cynicism, disengagement, and a breakdown in the social contract between citizens and their representatives.

- Misallocation of resources: Unethical decisions, such as awarding contracts based on personal gain rather than merit, can result in the misallocation of scarce public resources. This can lead to suboptimal outcomes, wasted funds, and a failure to address the community's most pressing needs.

- Inequitable service delivery: Lack of integrity can lead to unfair or discriminatory treatment of citizens, such as providing better services or access to those with personal connections or who offer bribes. This undermines the principles of equity, inclusion, and social justice that are central to good governance.

- Damage to the LGU's reputation: Ethical scandals or perceptions of corruption can severely damage the LGU's reputation, both within the community and among external stakeholders such as investors, partners, or higher levels of government. This can make it harder to attract resources, talent, and support for the LGU's work.

- Decreased staff morale and performance: When unethical behavior is tolerated or even rewarded within the LGU, it can create a toxic work culture that demoralizes staff who are committed to integrity. This can lead to decreased motivation, productivity, and retention of ethical employees, further eroding the organization's capacity and performance.

- Legal and regulatory consequences: Serious breaches of ethics, such as fraud, embezzlement, or conflicts of interest, can result in legal and regulatory sanctions against the LGU and individual officials. This can include fines, penalties, or even criminal charges, diverting resources and attention from serving the public.

- Undermining of democratic values: At its core, lack of ethics and integrity in local governance undermines the fundamental values of democracy, such as transparency, accountability, and the rule of law. It can contribute to a broader erosion of democratic norms and institutions, and fuel public disillusionment with the political process.

IMPROVING THE COMPETENCY IN ETHICS AND INTEGRITY

Institutional Level:

- Develop and enforce a code of ethics: Establish a clear, comprehensive code of ethics that defines the standards of behavior expected of all officials and staff. This should cover areas such as conflicts of interest, gifts and hospitality, use of resources, confidentiality, and reporting of misconduct. Ensure that the code is regularly communicated, trained on, and enforced consistently.

- Provide ethics training and education: Offer regular training and education programs on ethics and integrity for all officials and staff. This can include workshops on ethical decision-making, case studies of real-life dilemmas, and discussions of the LGU's values and principles. Ensure that training is practical, engaging, and tailored to the specific roles and challenges of different positions.

- Establish clear accountability mechanisms: Put in place robust systems and processes for monitoring, reporting, and addressing ethical breaches or misconduct. This can include anonymous reporting channels, protection for whistleblowers, and clear

protocols for investigation and disciplinary action. Ensure that these mechanisms are well-communicated, accessible, and trusted by staff and the public.

- Promote transparency and public engagement: Foster a culture of transparency and openness in the LGU's decision-making and operations. This can include proactive disclosure of information, regular public consultations and feedback mechanisms, and partnerships with civil society and media to promote accountability. Engage the public in dialogue about the LGU's ethical standards and performance, and seek their input and oversight.

- Lead by example: Ensure that senior leaders and elected officials model the highest standards of ethics and integrity in their own behavior and decisions. This includes avoiding conflicts of interest, being transparent about assets and interests, and demonstrating commitment to the public good above personal gain. Hold leaders accountable for setting the tone and culture of integrity within the organization.

Individual Level:

- Develop moral courage: Cultivate the moral courage to do the right thing, even when it is difficult or unpopular. This includes being willing to speak up against unethical behavior, resist pressure to compromise one's principles, and make decisions based on ethical considerations rather than expediency or self-interest.

- Practice ethical awareness: Develop the habit of considering the ethical dimensions of one's actions and decisions, even in seemingly small or routine matters. Ask questions such as "Is this the right thing to do?" "Who could be harmed by this?" and "Would I be comfortable if this were made public?" Seek out guidance or advice when faced with ethical dilemmas or uncertainties.

- Maintain professional boundaries: Be mindful of maintaining appropriate professional boundaries and avoiding situations that could create conflicts of interest or perceptions of impropriety. This includes being cautious about accepting gifts, favors, or hospitality that could be seen as influencing one's decisions, and disclosing any potential conflicts promptly.

- Uphold the public trust: Always remember that as a public servant, one's primary duty is to serve the public interest and maintain the trust placed in government. This means making decisions based on merit, equity, and the greater good, rather than personal or partisan interests. It also means being a good steward of public resources and using them efficiently and effectively.

- Seek continuous learning and improvement: Commit to ongoing learning and development in the area of ethics and integrity. This can include staying updated on relevant

laws, policies, and best practices, seeking out training and resources, and engaging in reflective practice to identify areas for personal and professional growth.

By implementing these strategies at both the institutional and individual levels, the LGU of Paglat can cultivate a strong competency in ethics and integrity among its municipal officials and staff, building public trust, ensuring fair and effective governance, and modeling the highest standards of public service. This is essential for achieving the LGU's mission of serving the community with excellence, responsiveness, and accountability.
